Attn: Steve Corbin  
Re: Cesar Chavez School Topo - Revised

Dear Steve,

Swanson Engineering is pleased to provide you with this revised proposal for Surveying Services for the Cesar Chaves Elementary School project. We will provide a topographic survey of the area clouded on the attached site plan for a lump sum of \$26,500. We will include utilities shown on as-built plans, if available. We will also tie the elevation datum to the original site improvement plans. Not included is a boundary survey or title report.

If this proposal is acceptable, please sign below.

Sincerely,

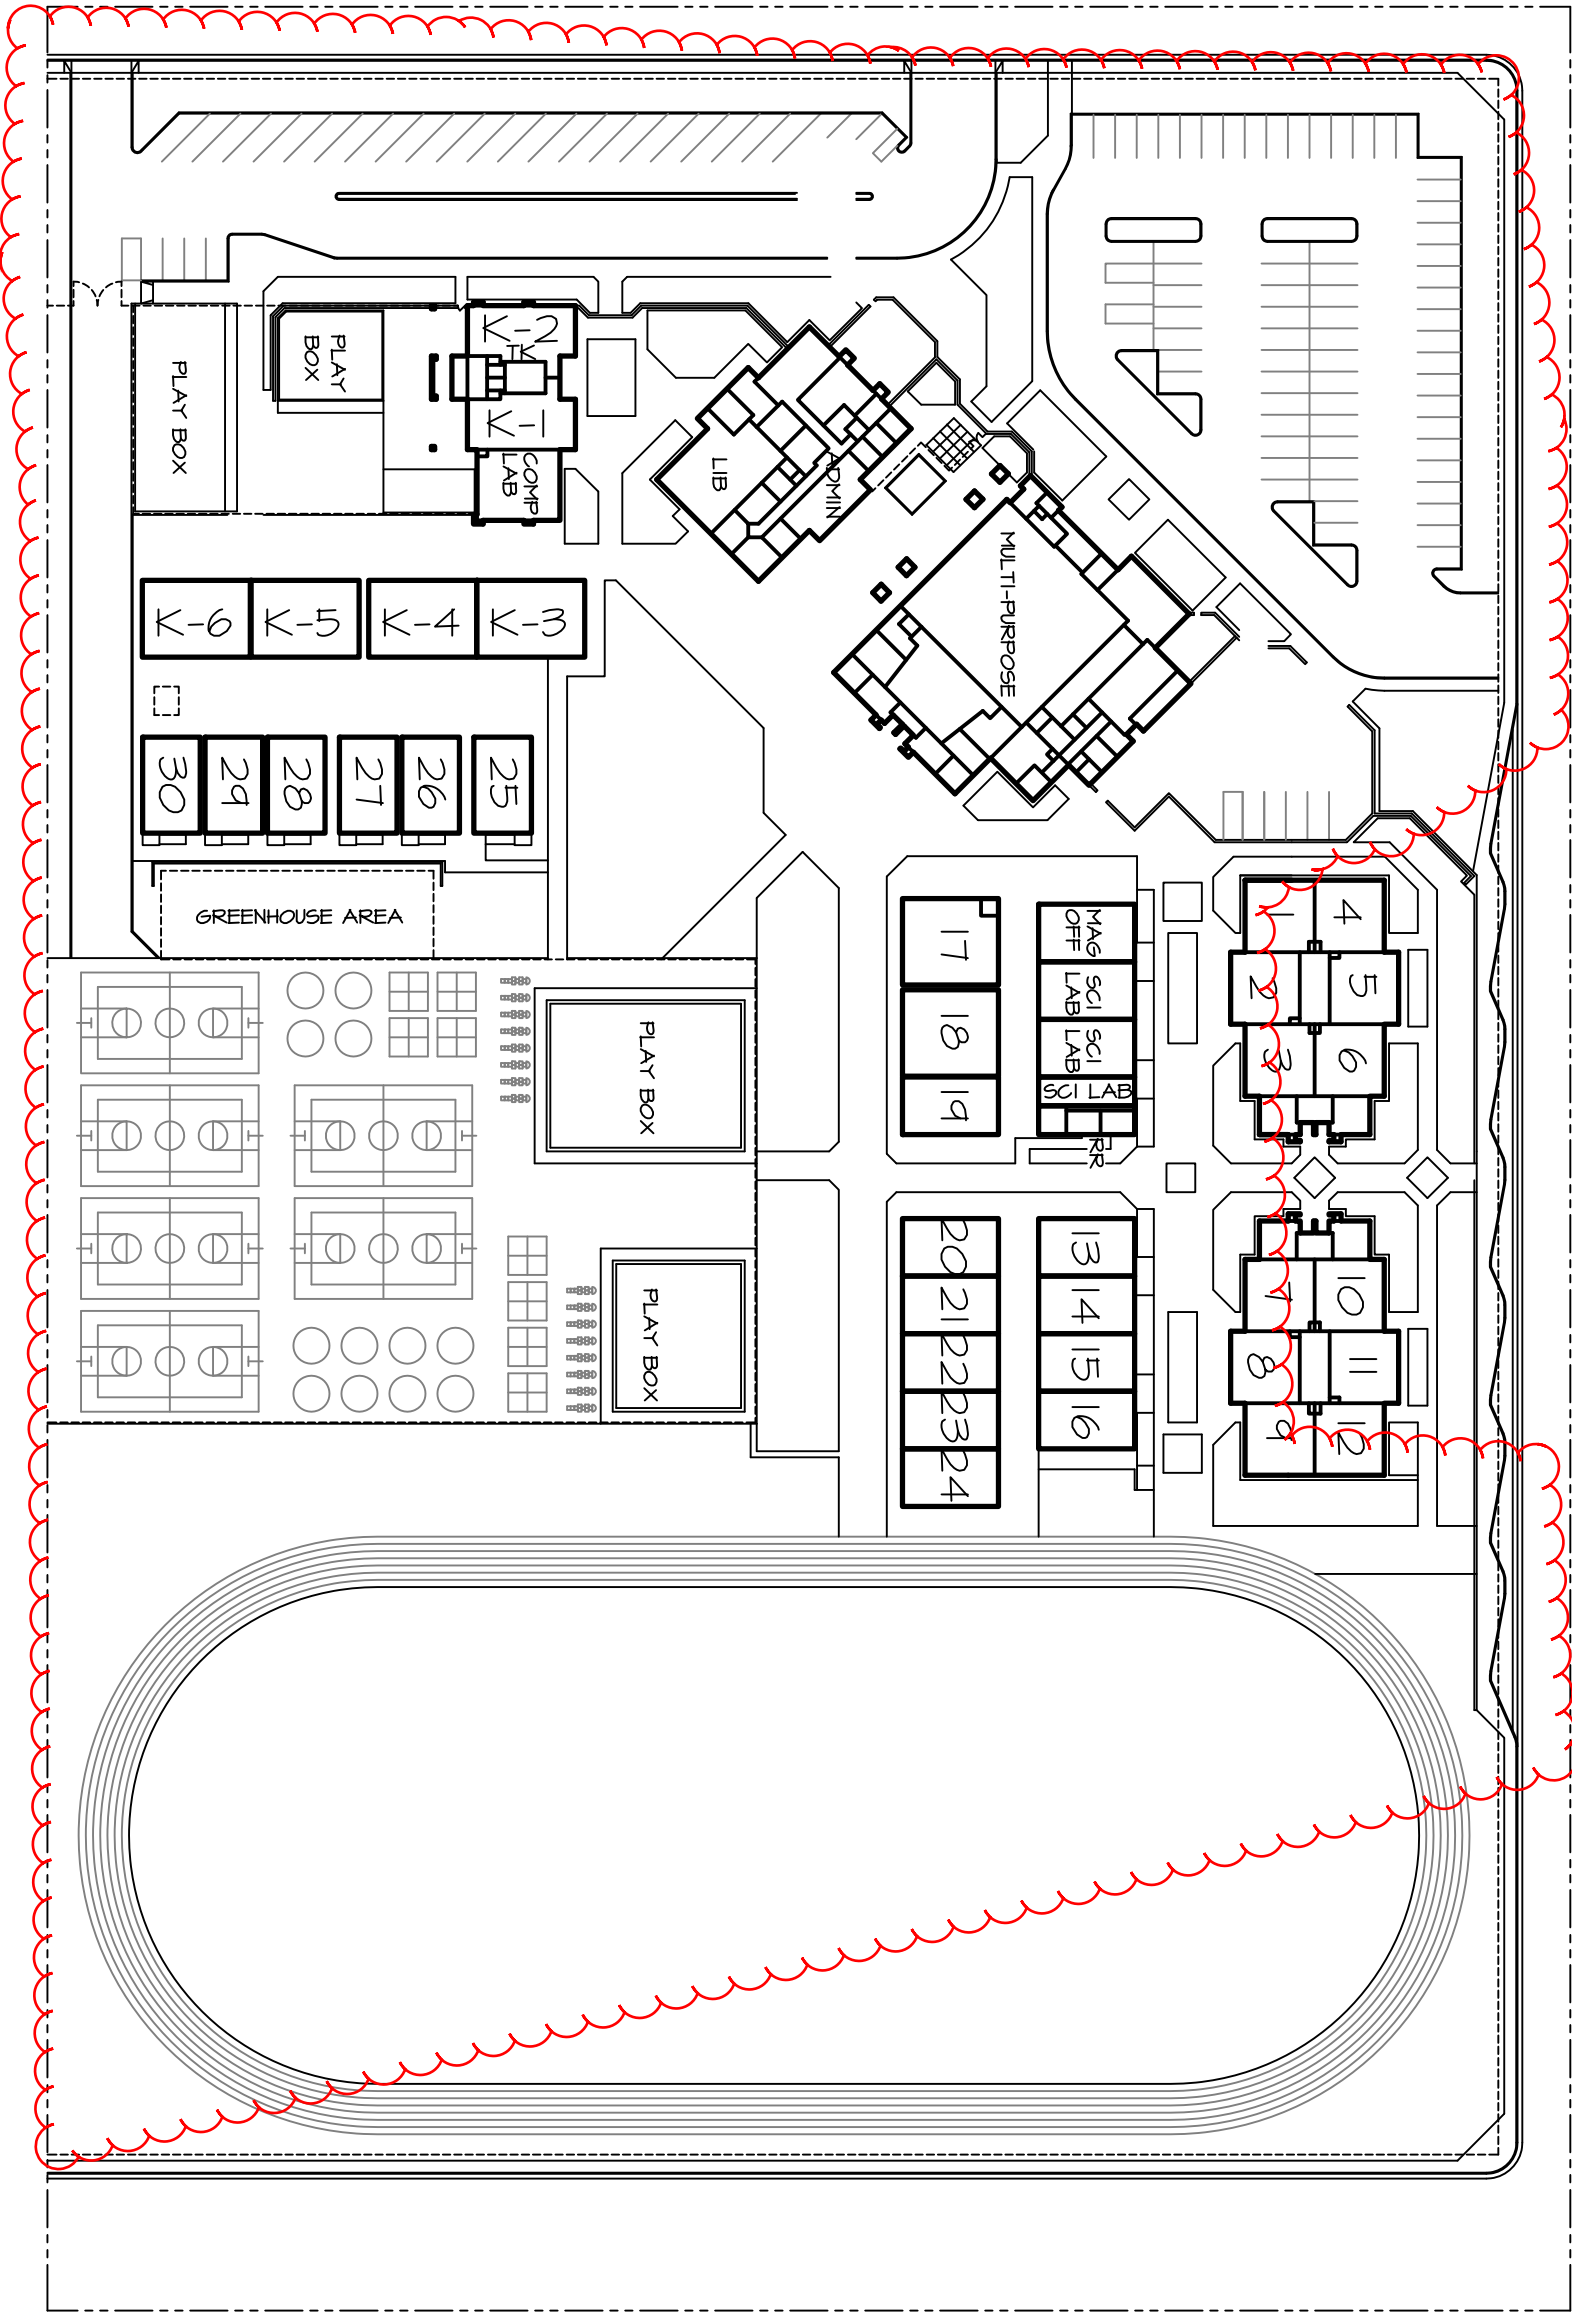

Bob Swanson
